Solar PV Powered UV Water Treatment: How To Solar Power UV Water Sterilizing Systems For Drinking Water Onsite

Synopsis

Sterilizing water is a big job. Solar electric (PV) powered UV water sterilizers are an effective way to sterilize your water from local polluted sources, even brackish water, with safety, reliability, and no fuel-costs. Water found in nature is full of pathogens which can cause disease and illness.

Ultra-violet (UV) sterilizers kill 99.99% of all dangerous pathogens and render your water potable and safe to drink. The need for water treatment usually occurs far away from an electrical outlet.

Remote sites and locations, as well as occasions of natural or man-made disaster, often need water treatment onsite but lack the equipment and power supply to power the water sterilizing equipment on location. Solar PV powered UV water sterilizer systems offer complete solutions for remote-site water treatment and sterilization. This audiobook focuses on UV water treatment from four Gallons per minute to 43,000 gallons per day - all solar powered. Included are specific solar power supply examples, with included parts lists, to power these UV water sterilizing systems at your remote and off-grid location.

Book Information

Audible Audio Edition

Listening Length: 1 hour and 46 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Solardyne, LLC

Audible.com Release Date: November 24, 2014

Whispersync for Voice: Ready

Language: English

ASIN: B00Q3HESRA

Best Sellers Rank: #64 in Books > Engineering & Transportation > Engineering > Energy

Production & Extraction > Alternative & Renewable > Solar #381 in Books > Audible Audiobooks > Science > Technology & Engineering #2631 in Books > Science & Math > Nature & Ecology > Conservation

Customer Reviews

no details on system design and no drawings
