Metal Fabrication Technology For Agriculture

Synopsis

METAL FABRICATION TECHNOLOGY FOR AGRICULTURE, 2E provides your students with an easy-to-understand, safety-conscious introduction to agricultural welding processes and techniques. Each section of this full-color book begins by introducing your students to equipment and materials used in agricultural welding and includes complete setup instructions. The subsequent chapters in each section allow your students to learn individual welding techniques in various applications and positions. METAL FABRICATION TECHNOLOGY FOR AGRICULTURE, 2E provides extensive coverage of brazing and specialized nonmetallic fabrication, designed to lead your students step-by-step in developing the skills necessary for welding all types of agricultural machinery. Each chapter includes close up shots of actual welds and learning aids that have been proven to be effective, making this how-to and reference manual a key resource for students participating in agriculture education programs throughout the country. Reference

Customer Reviews

Great Book with color photographs, giving better detail of what the arc should be, with comparisons of what the weld should look like. Compare this to a pen drawing or schetch in other books, and you'll see what I mean.

Great reference material.
