Plague: One Scientist's Intrepid Search For The Truth About Human Retroviruses And Chronic Fatigue Syndrome (ME/CFS), Autism, And Other Diseases

Synopsis

On July 22, 2009, a special meeting was held with twenty-four leading scientists at the National Institutes of Health to discuss early findings that a newly discovered retrovirus was linked to chronic fatigue syndrome (CFS), prostate cancer, lymphoma, and eventually neurodevelopmental disorders in children. When Dr. Judy Mikovits finished her presentation the room was silent for a moment, then one of the scientists said, "Oh my God!" • The resulting investigation would be like no other in science. For Dr. Mikovits, a twenty-year veteran of the National Cancer Institute, this was the midpoint of a five-year journey that would start with the founding of the Whittemore-Peterson Institute for Neuro-Immune Disease at the University of Nevada, Reno, and end with her as a witness for the federal government against her former employer, Harvey Whittemore, for illegal campaign contributions to Senate Majority Leader Harry Reid. On this journey Dr. Mikovits would face the scientific prejudices against CFS, wander into the minefield that is autism, and through it all struggle to maintain her faith in God and the profession to which she had dedicated her life. This is a story for anybody interested in the peril and promise of science at the very highest levels in our country.

Book Information

Hardcover: 464 pages

Publisher: Skyhorse Publishing; 1 edition (November 18, 2014)

Language: English

ISBN-10: 1626365652

ISBN-13: 978-1626365650

Product Dimensions: 6.1 x 1.6 x 9.1 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars • See all reviews • (128 customer reviews)

Best Sellers Rank: #153,301 in Books (See Top 100 in Books) #10 in Books > Medical Books > Basic Sciences > Virology #28 in Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Forensic Medicine #56 in Books > Health, Fitness & Dieting > Diseases & Physical Ailments > Chronic Fatigue Syndrome & Fibromyalgia

Customer Reviews

December 7, 2014 A Book Review of "Plague" by Kent Heckenlively and Judy Mikovits By Russell Dobkins This is a "Great Book"! I have read many "Great Books", including "Our Stolen Future" by Dr. Theo Colburn, "Silent Spring" by Rachael Carson, "Pandora's Poison" by Joe Thornton,

"Radioactive Heaven and Earth" by IPPNW, "Nutrition and Physical Degeneration" by Dr. Weston Price, "The China Study" by Campbell, "Not On The Label" by Lawrence, "Harvest of Empire" by Juan Gonzalez, "Hypothyroidism, The Unsuspected Illness" by Dr. Broda Barnes, "The Death of Money" by James Rickards. "Plague", by Judy Mikovits, PHD and Kent Heckenlively, fits in this list of important books. They all shed light on what is going on. I studied Chemistry and Biology in College. All the things I have studied, Human Anatomy and Physiology, Microbiology, Genetics, Cell Biology, Toxicology, Immunology, Neurobiology, Organic Chemistry, Bio-Chemistry, Neurobiology, Pharmacology, Human Health and Nutrition, Genetics, Developmental Biology, Infectious Diseases, and Virology, have put me in a position to really appreciate the work Judy Mikovits has done. That she could write it, after all the horrible, illegal, dishonest, and so very stressful things that people in power, did to her, just because she was honest about revealing the truth of what she was finding, is astounding! The Foreward; "A Disease Able to Affect the Economies of Nations", by Hillary Johnson, says it well. Dr. Mikovits found, using rigorous scientific method, first class and up to date, state of the art, laboratory techniques, a new man-made virus.

"Plague" is in my opinion the most important book ever published on the neuro-immune disease ME/CFS, an extremely debilitating, chronic disease that usually catapults its victims from all professional and social contexts for the rest of their lives and which is euphemistically called "chronic fatigue syndrome" and denigrated and often confused with chronic fatigue or burnout. (ME / CFS = Myalgic Encephalomyelitis / Chronic Fatigue Syndrome - ICD-10 G93.3) This book does not only concern ME / CFS sufferers, but actually the whole of mankind, even those people who are still healthy. The book does not only concern this unfortunate patient group which is neglected by medical science and health care systems and which is discriminated against as malingerers for decades. For many other diseases such as autism, neurodegenerative diseases, cancer etc. the co-author Judy Mikovits has found evidence of infection with man-made gamma retroviruses (distant relative of HIV) - and most frightening is that she (and others) also found it in about 6% of the (yet) healthy US population. Paul Cheney, one of the doctors who witnessed an epidemic outbreak of ME/CFS in the mid-1980s at Lake Tahoe in Nevada/USA, once said to me: "At best, this is the worst epidemic mankind has ever faced, and in the worst case, this is the end of humanity". An absolute doomsday scenario - more than 6% of the population is probably infected with a transmissible retrovirus that causes, just like his big brother HIV, an acquired immune deficiency that consequently results in a number of diseases, the incidence of which has already reached epidemic proportions. Non-HIV-AIDS - that's how Mikovits called the disease ME/CFS, might

be only the tip of an iceberg of unimaginable dimension.
