My Book Of Alphabet Games

Synopsis

In this third book in our alphabet series, children learn to link uppercase and lowercase letters and reinforce their sense of alphabetical order. All of this is done with fun and stimulating activities, such as tracing, connect-the-dots, and color-by-letter. Ages 4-6

Grade Level: Preschool and up

Customer Reviews

I was completely disappointed with this book. The entire book is made up of a couple dozen dot-to-dots and then just page upon page of letter tracing. I was actually hoping for some games, but no, there are none. You can get hundreds of dot-to-dots or tracing pages from the internet. But if you do buy this book, just consider it a workbook, not a game book. Nothing fun or exciting here.

This book is great to reinforce letter recognition and ABC order (through dot-to-dots). Also, there is a lot of practice writing upper and lower case letters (much of what would be covered in the "lowercase letters" and "uppercase letters" kumon books). My almost-4-year old enjoys this very much. It also gives me an opportunity to reinforce letters and their sounds in small chunks rather than one at a time, which ends up aiding in ABC order recognition.

Kumon books are great for my 4 year old. He has fun and they really help him learn in small easy

steps. Don't sign up for expensive Kumon courses, just get the workbooks- it's cheaper and allows you to spend that quality time with your child.

My son really enjoys the Kumon books and this one was no exception. I was hoping there would be a greater variety of games, but he seemed to enjoy himself. Lots of letter tracing which is good for building confidence, join the numbers etc.

The Kumon My Book of Alphabet Games is a wonderful next step workbook in practicing writing the alphabet if you have already completed the uppercase and lowercase workbooks. If you prefer to start handwriting with a workbook that is in alphabetical order then you could definitely use this workbook first. Of course, you will need to select additional workbooks to build upon this one. This book is not an alphabet "game playing" book to learn the alphabet. It is meant to solidify the understanding of letter sounds and writing letters. If you are looking for "games to learn the alphabet" then you should look elsewhere. But, if you are in need of a workbook that combines handwriting and reinforcement of letter sounds then this is a great book to use. This book and the dot-to-dot exercises are in alphabetical order and which helps reinforce the concept of alphabetizing. Both uppercase and lowercase letters are practiced in the second half of the book. Each letter also has an associated picture to help review letter sounds. Ages: The four to six years old age range is appropriate for this workbook since your child should already know the alphabet by this point. I would recommend starting this book immediately after using the uppercase and lowercase workbooks. Multiple Children: A workbook is needed for each child.

The Kumon series of books works by empowering children to succeed on their own. The books get successively more difficult as they build upon skills learned from the previous pages, so that by the end of the book the child has a sense of accomplishment and be ready to move on to the next level. The instructor is more of a mentor or coach than a teacher in a classroom. The Alphabet Games book is designed to help teach your child the letters of the alphabet by saying them, writing them and also with dot-to-dot games. It has lots of fun alphabet dot-to-dot shapes to trace that get progressively harder the further you go in the book. My 3 year old loves this Kumon book and is able to do most of the games on his own. I highly recommended this workbook for learning about the alphabet and helping to develop writing skills!

This is a fun book for your learning child if you are sitting with them or they know the alphabet well. If

your child does not know the alphabet yet, it is hard for them to use without a lot of assistance.

I am getting my 3 1/2 year old ready for pre-school for the fall, and these workbooks have been so wonderful for us! It helps me have a great teaching guide and he loves the puzzles.
