Like most people I deal with pain most of the time in one form or another. I have been searching for books dealing with inflammation and this is one of the most well written I have come across. The book starts with a short introduction that sets the stage for understanding inflammation. The first chapter describes the stages of inflammation and how it aids in the healing process. The differences between acute and chronic inflammation and various inflammatory disorders are explained. I found

this upfront information to be educational and well-written. I had never really thought about diseases like cancer and heart attacks as being inflammatory. Chapter two explains the causes of inflammation, both diseases and injuries. The third chapter makes it very clear that this is not a loss weight diet plan. General principles about food intake will help me in making decisions on what to eat if I am out for dinner or at a friend's house. An important list of foods to avoid followed by a list of food to include in your diet helped to educate me on what direction I should be heading. These sections of the book helped me greatly in better understanding the inflammation process and what I can do to aid in reducing inflammation from a diet perspective. Next up are the 25 promised recipes. There are recipes for breakfast, lunch, dinner, dessert and snacks. I have tried the Cinnamon Ginger Oatmeal and really liked the mix of cinnamon with ginger. I also had a small party and adjusted the recipe size for Pistachio-Crusted Chicken. It was delicious and everyone enjoyed it. There are plenty of recipes so I don't see myself running out of ideas anytime soon. It is good to know that I can adjust my lifestyle to better deal with pain from inflammation without eating an unappetizing diet.
